**Integration as a Priority Vector in the Innovative Development of the Cooperative Sector of Economy. P. 3.**

The purpose of the article is to show the need for integrating transformations in consumer cooperation, to consider a cooperative as a historical form of uniting people in a society of citizens aimed at self-organization, self-regulation, management and control, recognizing collective property. The authors define a cooperative and, in particular a consumer society as a format of rural civil society, show that civil society develops through the improvement of membership relations with shareholders, and consider it necessary to fully follow the principles and values adopted in the international cooperative movement. An increased level of socialization in management means that a cooperative functions as a business system and as an association of shareholders, using the uniqueness of its dual nature.

**Key words:** unification of the transformation, the cooperative format of the civil society, the management of the collective enterprise.
